

**JSC "Borisovski DOK"**  
wood products manufacturing

## **Glued beam and houses from glued beam of our production**

JSC «Borisovski DOK» produces glued beam from coniferous woods (pine, spruce) with application of high-quality glues from AKZO NOBEL, Sweden.

Glued laminated beam is a construction material of the highest quality. It has all the advantages of wood and has practically no drawbacks of solid beam:

- ✓ it does not change its shape during usage;
- ✓ it has a greater strength, compared with normal wood
- ✓ minimal shrinkage in height;
- ✓ you can enter a new house immediately after its assembly
- ✓ to a lesser degree subject to cracking during its usage;
- ✓ high quality front surfaces that does not require additional processing before finishing;
- ✓ possibility of implementing complex architectural forms where solid beam cannot be used.

Our company has been producing high quality products for more than 100 years and is a leading exporter to the European and Russian markets.

Our in-house production guarantees high quality of beam.

In 2008 we received FSC certificate that confirms effective management of forest resources.

Quality is controlled not only visually, but also in our own laboratory using certified equipment. Each batch is tested for compliance with the physic-mechanical parameters.

Every 6 months we confirm the quality of glued laminated beam by the certificate of the Prague Forest Research Institute, confirming that the products meet all the requirements and characteristics of the European standard.

- **Houses from glued beam:**

Huge selection of finished projects. Our specialists will customize any project to the production.

Basic set:

- wall profiled beam;
- ceiling rafter and floor beam;
- rafter system.

Additional set:

- floor board, paneling, plinth, platband
- sawn timber for sheathing and other types of work

All products are packaged in a special film for protection from atmospheric phenomena.

**Flexible terms of payment:**

- **50% prepayment,**
- **50% upon readiness of the goods for shipping.**

Terms of production is up to 45 days.

Terms of delivery – FCA Borisov (Incoterms 2010).

Contact us per telephone or e-mail and our specialists will answer all your questions.
