

JSC "Borisovski DOK"
wood products manufacturing

Sawn timber and planed products of our own production

Planed products are made from pine and spruce and dried to a moisture content of 14-16% and processed on four-sided milling machines. High efficiency allows to keep competitive prices and have a wide range of products.

Our own production guarantees a high quality of used materials. In 2008 we received FSC certificate, which guarantees an effective management of forest resources.

We offers awn timber - trimmed, dried or of natural moisture.

Standard sections of saw timber:

Code 4407 11 930 0

width \ thickness	80/96	100	125	150
22	X	X		X
